## Hook

Don't take for granted  
The life on this planet  
We're just a piece of the puzzle with no right to demand it  
It's not about science it's common sense  
that will keep us surviving into the future tense

## Verse 1

I've always been taught to think of all things as equals  
So I never treated any living creature as a weaker  
I seek truth in the rocks trees and water  
To mother earth we are all sons and daughters  
Sometimes I sit and wonder what life really means  
When we're so wrapped up in being human beings  
And the rest of the world suffers cause we take  
And we don't give back the same amount of the mess that we make  
When will it get to the point of no return  
We hear of disasters are we next to crash and burn  
I hate to sound like a doomsday prophet  
But our actions our not good and we need to stop it  
So I'll keep respecting everything with every step I take  
And keep remembering that the future depends on moves we make  
For today right here think about what you do and how  
So we can grow old knowing that we made a difference now

Appreciation what is it for  
Love life and happiness could we ask for more  
Is it all about knowing who you are in the world  
Whether you're young or old boy or girl  
And how you recognize your right to eat, sleep and breath  
There's a reason why we're here and all that we achieve  
It's inside the sounds like the sway of the trees  
And the bugs that land on the branches and leaves  
Close your eyes for a minute and try to see  
That were just a small part of the land and seas  
So why should we think that we are better than anything  
When we lie cheat and steal to just to have better things  
It makes no sense when it's harming others  
It makes no sense to respect another  
So live like you want but think about the effects  
This big world will keep spinning and your just a speck
